## Sure Dental Services

**When you visit our facility you will become aware of our strong commitment to patient education and preventive care. Here at Sure Dental we believe that each patient should understand the importance and long-term benefits of oral care.**

Included in this section is a list of the many treatments that we offer as part of our commitment to you. Your treatment is based on a detailed diagnostic plan, using the most advanced techniques and only the highest quality materials.

We will always advise you of your treatment options and ensure that you completely understand the treatment process, and why we have recommended a certain direction.

On-going care will be provided, as no matter how well you brush and floss you will still accumulate plaque and calculus (sometimes called tartar), in hard to reach areas. Coupled with a regular hygiene visit we will also complete a routine examination to check for any abnormalities of the oral tissues and teeth. Early detection can help to avoid invasive or high cost treatment, and reinforces the many positive benefits that come with a happy healthy smile.

Please read on to learn about the individual treatments available. If you have any questions then please contact one of our facility coordinators for more information.

## About Sure Dental

Following the philosophy of our principal dentist Dr Ralph Kelsey, our aim is to prevent dental problems.

We encourage regular professional examinations. This allows immediate attention to potential problems and ultimately helps to keep your dental care costs to a minimum.

In addition to this philosophy, we offer complete dental treatment using the latest technology and most advanced materials.
